BLOOMZ

Schoolwide Communication System for Akiva Academy

Bloomz is the text message and email system used by Akiva to communicate with parents. You can get alerts to your cell phone in real time whenever a teacher, principal, or the office posts an announcement or assignment. This system is very effective to keep you up to date on all the important information coming from the school within a matter of minutes.

BLOOMZ text messages are an easy way to personally communicate with your child's teacher(s), office staff, and administration. Your message goes directly to the cell phone of the individual(s). This connection is made by the software system so no one's personal information is distributed. You can also use Bloomz to email the faculty, staff, and administration but text messages are faster and easier!

There are two ways to use Bloomz:

1.   You can download the app (Bloomz) to your phone

OR

2. Go to Bloomz.com and sign in.

You will get a class code for your student at orientation or from the school office. Simply go on the app and set up an account using your email and the password you choose.
